Education

Engineering Degree — Specialization in Image Processing

Sept. 2022 - 2027

EPITA — Paris

Image processing & synthesis, artificial intelligence and high-performance GPU computing.

Academic Exchange

Jan. - May 2024

Université du Québec à Chicoutimi (UQAC) — Canada

🌐 English: TOEIC certified

Professional Experience

Full-Stack & DevOps Developer (Internship)

Full-Stack DevOps CI/CD AWS Agile

Studiocanal

Sept. 2025 - Jan. 2026

Developed full-stack modules for rights management, contracts, and film catalog distribution. Setup and maintained cloud infrastructures (CI/CD, AWS) within an Agile team.

IT Consultant (Internship)

Django Python Agile SAFe

Hitachi Solutions France

June - July 2022

Prototyped a management application (suppliers, products, contracts) for Sonepar (Django, Agile SAFe).

Academic Projects

PFEE

Final-year project with the BNF (French National Library): segmentation and classification of illustrations from digitized heritage documents. Model benchmarks (YOLO, Florence-2), metric definition, weekly client follow-ups. (*Team of 4*)

Deep Learning YOLO

Project Management

ALPR

Automatic License Plate Recognition. Classic detection (filters, morphology) and ML (86% accuracy). Python vs C++ benchmarks. Complete GitLab workflow (issues, MRs, CI). (*Team of 2*)

OpenCV C++ ML

GitLab CI

IRGPU

Real-time video motion detection. CPU → GPU port with a 24× performance gain (bottleneck analysis via Nsight). (*Team of 4*)

CUDA C++ Nsight

FluidSim

Real-time fluid simulation engine based on SPH. Physical calculations managed via Compute Shaders and rendering via Framebuffers. (*Team of 2*)

C++ OpenGL GLSL

MedViz

Prediction of Forced Vital Capacity from CT scans. Pulmonary segmentation and ML (XGBoost). Docker containerization, GitLab CI pipeline. (*Team of 4*)

Computer Vision React

Docker GitLab CI

Skills

Computer Vision & AI

Image Processing Deep Learning Machine Learning OpenCV PyTorch

High-Performance Computing

CUDA GPU Computing OpenGL GLSL Nsight

Development & DevOps

C++ Python Docker GitLab CI AWS React/Next.js Django
